

Rachel Chan

chan.rce@gmail.com | 201-694-3802 | chanrce.github.io/rachelchan-portfolio

Education

Stevens Institute of Technology — Master of Science: Computer Science, GPA: 3.9

Relevant Coursework: Algorithms, Database Management Systems, Web Programming, Operating Systems, Math for Machine Learning, Foundations of Machine Learning
09/2024– 05/2026

Boston College — Bachelor of Arts, Double Major: Economics and Theatre

08/2016 – 05/2020

Skills

Programming Languages: Python, Java, SQL, TypeScript, JavaScript, HTML/CSS

Database Systems: MongoDB, PostgreSQL

Web Technologies: Express, Node.js, REST APIs, FastAPI

Tools: Git, Data Validation, Agile/Scrum

Projects

Before You Sign | TypeScript, Node.js, PostgreSQL

- Built a full-stack web app enabling NYC renters to look up buildings, read tenant reviews, and view housing violation histories pulled from NYC Open Data
- Developed client-side and server-side input validation across review, comment, and reply forms; fixed accessibility and HTML validation issues across all views

Mood Journal | Python, SQLite, Agile/Scrum

- Built a full-stack, multimodal web application for personal health tracking, allowing users to log moods, thoughts, photos, and voice recordings.
- Integrated a sharing feature to export mood data and trends with healthcare providers for better diagnostic insights.
- Managed end-to-end development lifecycle within an Agile framework, utilizing Scrum methodologies and sprints to iterate on feature delivery.

Experience

Backend & Machine Learning Intern

05/2025 – 08/2025

Simulacrum at Cornell Tech Runway Startup Program, NYC

- Researched, prototyped, and iterated on an API design to connect an ML model with client applications, focusing on data storage and security
- Programmatically built a data standardization pipeline to clean and unify raw datasets, improving consistency for machine learning workflows
- Explored and recommended potential SDK features to expand product capabilities and guide future technical development

Consumer Insights Analyst

12/2021 – 08/2024

NielsenIQ, Remote

- Transitioned to a high-stakes team focused on securing new clients through competitive RFP contracts, conducting follow-up analysis and custom data-driven insights to support targeted business pitches and contribute to client acquisition
- Played a critical role in a corporate transition to a unified platform, driving user engagement by analyzing usage patterns, addressing key challenges, and documenting FAQs, resulting in streamlined adoption across the company
- Led strategic initiatives for major industry conferences, ensuring high-quality deliverables that showcased data insights and strengthened the company's competitive position
- Improved analytical processes and methodologies, increasing efficiency and enhancing the accuracy of deliverables for both established and prospective clients
- Recognized with the Analyst Impact Award for contributions to key projects, reinforcing commitment to delivering actionable and impactful results

Academic Experience

Course Assistant: Database Management Systems & Python

01/2026 – 05/2026

Stevens Institute of Technology

- Mentored students in SQL, Python, relational algebra, and query optimization through office hours and debugging sessions
- Assisted students with database design, query development, and Python data-processing assignments
